

# New Interprise Hosting

## What distinguishes the new hosting?

1. Pricing structure – Allowing users to bundle features for their hosting like Database, Server space, and server traffic.
2. Combining all traffic on the domain including FTP, mail and web traffic – The hosting environment will have a allocated limit for server space and server traffic. Extra monthly bundles can be purchased, if limits gets reached out-of-bundle rates will apply.
3. Plesk administrator interface – Allowing Administrator to create a database, change hosting environment setting, and managing POP mail accounts. This interface also makes it easy to install third party applications Joomla, Mambo, Wordpress and OSCommerce.

you to keep the look and feel of your Website fresh with an unsurpassed flexibility and range of options. You can also use Article Publisher to get to know your Website dynamics in real time; view which Websites are sending the most traffic to yours, and which search engine spiders visit your site most frequently, and which pages they crawl. Track AdSense clicks and see precisely when and where users clicked. Best of all, automatic installation has you up and running in no time!

[joomla v1.5.1](#) Install

Joomla! is a powerful open source content management system. It is used for managing simple Web sites and complex corporate applications. Joomla! is easy to install, simple to manage, and reliable. Once Joomla! is installed and running, it is simple for even non-technical users to add or edit content, update images, and to manage critical data. Anybody with basic word processing skills can easily learn to manage a Joomla! site.

[PostNuke v0.761a](#) Install

PostNuke is software that creates an impressive, dynamic Web site and provides the Webmaster with a site they can administer with a minimal amount of HTML knowledge through a Web browser. PostNuke provides the following features: Web-based administration panel; WYSIWYG (What You See Is What You Get Editor); support for multiple languages; user registration and
